

Deployment of Hostel Management or Leave Management System (Frontend) on Cloud using Vercel

📌 Objective

The objective of this assignment is to:

- Understand **cloud deployment concepts**
- Deploy a **frontend-based Hostel Management System or Leave Management**
- Learn **CI/CD using GitHub + Vercel**
- Understand **SaaS frontend hosting architecture**

🏠 System Overview

Students will choose one system from hotel management or leave management and build a **frontend-only** with the following modules:

🏠 Modules for Hostel Management:

1. Room Management UI
 - Room list
 - Room availability
2. Student Allocation UI
 - Assign student to room
3. Checkout / Vacate UI
4. Dashboard UI
 - Occupied rooms
 - Available rooms
 - Total students

🏠 Modules for Leave Management:

📝 1. Apply Leave Page

- Employee id and name, department
- Leave type (Casual / Sick / Annual)
- From date / To date
- Reason

- Submit button
-

2. Leave History Page

- Table of:
 - Employee name
 - Leave type
 - Dates
 - Status (Pending / Approved / Rejected)
-

3. Approval Process for department head and then HR(Admin UI)

- List of pending requests
- Approve / Reject buttons (UI only)

4. Dashboard Page

- Total employees (dummy)
- Leaves applied
- Pending approvals
- Approved leaves

Charts (optional but recommended):

- Leaves per month
- Leave type distribution

Technology Stack

- HTML5 / CSS3 / Bootstrap (or any frontend framework)
 - JavaScript (basic logic if needed)
 - GitHub (for code repository)
 - Vercel (for deployment)
-

Deployment Platform

🔑 Students must deploy their project on:

- Vercel

Optional:

- GitHub for version control

Step-by-Step Deployment Instructions

Step 1: Create Project

- Build frontend project locally
- Organize files:
- Such as
 - rooms.html
 - allocation.html
 - dashboard.html

Step 2: Push Code to GitHub

- Create GitHub repository
- Upload project files

Step 3: Deploy on Vercel

1. Go to Vercel website
 2. Login with GitHub
 3. Click **“New Project”**
 4. Import repository
 5. Click **Deploy**
-

Step 4: Get Live URL

- Vercel will provide a public link like:

`https://hostel-system.vercel.app`

Requirements

Students must:

✓ Functional Requirements

- Navigation between pages
- Clean UI design
- Dashboard with summary cards
- Dummy data (no backend required)

✓ Cloud Requirements

- Must be deployed on Vercel
- Must be accessible via public URL
- Must use GitHub integration (preferred)

Submission Requirements

Students must submit:

1. GitHub repository link
2. Vercel live deployment URL
3. Screenshots of:
 - Dashboard
 - Room management page
 - Deployment success page
